THE GIRL ON THE JOB

How to Succeed—How to Get
Ahead—How to Make Good

By JESSIE ROBERTS

LUCKY STRIKES

THE business of making lucky
strikes has by no means gone out
of date. It isn't necessary these days
to kill Indians or give a dying miner
a drink. You can do it in less mov-
ing picture ways than that.

A good idea properly handled has
often proved the best sort of a lucky
strike.

Take the case of Elsie Shaver of
New York. She conceived an original
idea in regard to dolls. She carried
it out to the last detail as perfectly
as she could—and that means a lot.

Here is the result.
The dolls found a welcome waiting
for them. They were high priced, but
they were worth it. And people
bought them.

Now there is a little shop working
fulltime making the dolls. There is a
large force following the designs
made by Mrs. Shaver. Money pours
in, and it is a good business enter-
prise—just a lucky strike.

Other lucky strikes have been made
by young women in the advertising
business. Sculptors have made them
with a quail figure. I know a girl
who had a bright idea regarding a
department of the store where she
works. She found the department at
a mighty good salary now.

Lucky strikes are good things, and
we don't all fall on them. But I no-
tice that each one that really brings
success is accompanied by a lot of
hard work. The lucky striker has not
sat around waiting for luck to do the
rest.

No. She got busy herself.

ELKS WILL DANCE ON
WEDNESDAY EVENING
Another one of the winter dance
series under the auspices of Tonopah
Lodge of Elks No. 1462 will be given
on Wednesday evening of this week,
and a large attendance is assured.
These events are always looked for-
ward to with much interest by reason
of the fact that the entertain-
ment is wholesome.

REVOLUTION IS CURBED BY USE OF TELEGRAPHY

(By Associated Press)

MEXICO CITY, Feb. 13.—Wireless
telegraphy has contributed greatly
to keeping down revolution in Mex-
ico and the government, recognizing
its value, is establishing stations in
every large city in the republic.

Officials assert that by using the
wireless they are able to communi-
cate directly and immediately with
military headquarters and thus are
able to head off many incipient upris-
ings which might grow into serious
revolutions if not promptly checked.

In the old days the first thing a
band of rebels did was to cut all
telegraph and telephone wires, thus
isolating the region of revolt.

In its station at Chapultepec park
here the Mexican government has
one of the largest and best equip-
ped plants on the continent. Dur-
ing the Carranza administration the
station was practically idle but dur-
ing the past few months it has been
used daily by the government in
sending official news letters to Cen-
tral and South American countries
and in keeping its ministers and con-
suls informed of affairs at home.

REPLICA WASHINGTON HOME WILL BE SOLD

(By Associated Press)

SAN FRANCISCO, Cal., Feb. 13.—
A replica of George Washington's
home at Mount Vernon, one of the
few remaining buildings of the Pa-
cific International exposition in
1915 still standing on the military
reservation at the Presidio, is to be
auctioned off. Army orders have
been received to sell, salvage, re-
move or destroy the building.

GET FORECASTS BY WIRELESS

Kansas Agricultural College Makes
Arrangement to Furnish Farmers
With Weather Probabilities.

The Kansas Agricultural college
has announced that it will furnish the
weather forecasts to every Kansas
farmer by wireless telegraph. The
farmer will be required to install an
amateur wireless set with which to
receive the forecast. These sets cost
about \$35 each and can be operated
by any person. They cannot be used
for sending messages for any con-
siderable distances but they will re-
ceive the powerful messages of the
big plants. The forecasts are to be
sent out at 9:55 each morning under
a standard code and on the wave-
length of 375 meters, short enough for
any amateur set to take. This wave-
length is also long enough and the
college plant is powerful enough so
that the message will reach every
point in the state. The forecast will
be sent at the rate of 18 words a
minute and then repeated at 10 words
a minute. The service is to be given
free to every farmer, high school
or to any other person or institu-
tion having a wireless set. The high
schools in the small communities are
to distribute the forecast to the banks
and stores and to the telephone com-
panies. The knowledge of the prob-
able weather is of considerable im-
portance to farmers during the har-
vest and haying season, and to stock-
men during the winter, for they can
make preparations for feeding and
sheltering stock upon knowing of an
approaching storm.

PLAN MORE OSTRICH PLUMES

South African Raisers of the Birds Be-
lieve They Can Largely Increase
the Supply.

An effort is being made by South
African ostrich farmers to increase
the plumage of ostriches, and Pro-
fessor Deverden believes this can be
done by as much as 25 per cent, but
W. P. Pyecraft, the great English nat-
uralist, is skeptical.

The number of plumes from each
wing averages 30, and occasionally
runs as high as 42 in the South Afri-
can species and 39 in the North Afri-
can. The latter is the larger bird
and its bones are denser. The Groot-
fontein School of Agriculture is trying
by proper mating to breed a race of
42 plume birds.

Professor Pyecraft writes in the Illus-
trated London News that the ances-
tor of the ostrich undoubtedly pos-
sessed the power of flight, when the
wing quills of the hand numbered 16,
while the secondary feathers, attached
along the forearm, probably did not
exceed 26. This was the original in-
heritance and it can never be in-
creased, especially now that the whole
wing has degenerated into a mere
wreck of its original self.

There are now about 1,000,000 birds
on the African ostrich farms and the
value of their exported feathers is
about \$15,000,000.

Overcoming Plant Disease.

Announcement by scientists at Cam-
bridge university that it is now pos-
sible to breed disease-proof plants,
following a long series of immunizing
tests applied to grains, potatoes and
other growths, ought to shed a ray of
light upon the world sorely vexed by
food problems.

Potato disease alone has cost this
country untold millions of dollars. If
this one article of food could be pro-
tected against the destructive fungi
that attack it so persistently, a solid
food basis would be assured. As it
is, potatoes, which should be the cheap-
est and most plentiful food, now fluctu-
ate from moderate prices to prices
that are absurdly high.

The checking of plant disease is
second only in importance to over-
coming the diseases that attack hu-
manity. At this time of food scarcity
any progress that can be made toward
conserving the world's crops will be
doubly a blessing.—New York Trib-
une.

League Covenant in Esperanto.

In the case of most international
conventions a version in one language,
customarily French, is taken as the
original text. The treaty of Versailles,
however, stipulates that the French
and English texts shall have equal au-
thority. But a perfectly equivalent
translation of anything more complex
than the multiplication table is im-
possible and already controversies
have arisen over supposed discrepan-
cies in the two versions. So the Es-
perantists of Paris have published
their "Kontrakto de la Ligo de Nacioj"
with the suggestion that by making
Esperanto the official language of the
league all disputes would be avoided.
—Independent, New York.

Electricity in East Prussia.

According to press reports from Ko-
nigsberg, the provincial board has ap-
proved a plan for the uniform supply
of electric power for the province of
East Prussia. The plants and instal-
lations, the completion of which will
require ten years, will, through the
development of water power, insure
East Prussia's electrical supply inde-
pendently of the coal question.

Airplanes for Sighting Fish.
Airplanes which were used to spot
submarines may now be employed to
sight schools of fishes. The method
has been employed off Toulouse,
France, with success. An airplane
discovered a big bank of fishes and
immediately gave the signal to some
fishermen, who hastened to the spot
and made a great catch.

TO PENETRATE DEEP MYSTERY OF THIS EARTH

PASADENA, Cal., Feb. 13.—Crea-
tion of cosmic crucibles similar to
the new theory of stars out of which
primordial matter is developed is
planned here by utilization of high
potentials upward of a million volts
in a series of laboratories building
here under direction of Dr. Robert
A. Millikan, who isolated the elec-
tron. One of the units of these lab-
oratories was just dedicated in open-
ing of the Norman Bridge laboratory
of physics. The final unit soon to
be erected will be the electrical lab-
oratory.

A trinity of sciences, physics,
chemistry and astronomy will, ac-
cording to Dr. Millikan, unite in an
effort to penetrate the deepest of
mysteries, the creation of the earth.

MEXICAN WETS MUCH ALARMED OVER CAPITAL

(By Associated Press)

MEXICO CITY, Feb. 13.—The
"wets" in Mexico are frankly alarm-
ed. They say there is a real pos-
sibility that Mexico City, at least,
may "go dry" before the end of the
year and that if so, the next step
would be to make the entire repub-
lic arid of alcoholic beverages.

President Obregon does not say
that he is a prohibitionist, but with-
in the past few months he has given
his unqualified support to certain le-
gal measures which aim to cut down
drinking and eventually to put intox-
icants under the ban.

Saloons, clubs and cantinas have
been put under more rigid restric-
tions and, only a few weeks ago,

a presidential decree increased the
federal revenue tax on alcoholic
drinks 100 per cent. There are many
rumors that these taxes will be au-
tomatically increased until they be-
come prohibitive.

Nation-wide protest was heard sev-
eral days ago when the newspapers
said that President Obregon con-
templated issuing a decree forbid-
ding the planting and cultivation of
the maguey plant which is the basic
ingredient of the most popular na-
tive drinks.

BANK BUFFET

YOU!

should investigate The Bonanza's new AUTOCASER ADVERTISING
SERVICE.

We receive tri-weekly service and are prepared to furnish cuts showing
the latest creations in wearing apparel for men, women and children;
also catchy service touching upon autos, and all other lines of business.

CASTING SERVICE IS FREE

We make no charge for this Casting Service. The cuts are furnished
free to our advertisers.

Call at this office or phone the advertising department, and you will
gladly be shown samples.

SERVICE IS UNEQUALLED

AUTOCASER SERVICE is in a class by itself. The Bonanza has installed
the latest AUTOCASER, and prompt service is assured.

LET US HELP YOU INCREASE YOUR BUSINESS

This illustration of the
New Queen Broom Holder
will give you an idea of how
handy and simple it really
is—No home is complete
without this practical, con-
venient device. We have
one for your home and
want you to call and re-
ceive this useful household
necessity with our compli-
ments.

Sincerely,

Tonopah Hardware Co.

Kindly bring this card.

IMPORTANT NOTICE

To Secretaries of Corporations Doing Business in
Nevada But Incorporated in Other States

OUR CHARGE \$9.00

SECTION 1.—All foreign corporations doing business in the State of Nevada shall, not
later than the month of March in each year, beginning in the year 1914, publish a state-
ment of their last year's business in some newspaper published in the State of Nevada.
If published in a daily newspaper, such statement shall be published for a period of one
week, or if published in a semi-weekly or tri-weekly newspaper, for a period of two
weeks; or if published in a weekly newspaper for a period of four weeks.

SECTION 2.—The secretary of the company publishing the statement shall file a copy with
the assessor of each county of the State of Nevada, in which said company is doing
business.

SECTION 4.—Any district attorney in the state is competent to sue to recover the penalty, or
the attorney general. The first county suing through its district attorney shall secure
the penalty, and if no suit is brought for the penalty by any district the State shall
have the right to recover through its attorney-general.

The TONOPAH DAILY BONANZA will make publication required by law, which includes
the filing of a sworn affidavit of publication with the assessor of each of the counties of the
State, within which the company is doing business; an affidavit of publication will also be
furnished secretaries.
